Restriction Requirement

35 U.S.C. § 121

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- a. Group I, claim(s) 1-3, 11, and 15, drawn to a **screening assay** to identify inhibitors of **influenza virus NP:host cell** binding interactions, classified in class 435, subclass 7.1.
- b. Group II, claim(s) 1,9-11, and 15, drawn to a **screening assay** to identify inhibitors of **influenza virus NS1:host cell** binding interactions, classified in class 435, subclass 7.1.
- c. Group III, claim(s) 18-20, drawn to a **method** for **treating** influenza virus infection by administering a **compound** that inhibits **influenza virus NP:host cell** binding interactions, classified in class 514, subclass 1.
- d. Group IV, claim(s) 18, 26, and 27, drawn to a **method** for **treating** influenza virus infection by administering a **compound** that inhibits **influenza virus NS1:host cell** binding interactions, classified in class 514, subclass 1.
- e. Group V, claim(s) 28-30, 2-36, 38, and 39, drawn to **nucleic acids** and expression vectors encoding **NPI** host cell factors, classified in class 536, subclass 23.1
- f. Group VI, claim(s) , drawn to **nucleic acids** and expression vectors encoding **NS1** host cell factors, classified in class 536, subclass 23.1

The inventions are distinct, each from the other because of the following reasons:

Unrelated Inventions

Inventions I-VI are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04 and § 808.01).

In the instant case, each of the identified groups is directed toward a structurally/functionally different product or assay that accomplishes different scientific reagents and protocols. Separate searches will clearly be required for each invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and require separate searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143). Applicant is also advised that the claims should be amended to reflect the election, where necessary.

37 C.F.R. § 1.48(b)

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
